

Side by Side

*I was lost and I was lonely,
Couldn't find my way around
You said, "Come on, my lovely man,
come and take me by your hand".*

*Days turned into months
and months will turn into years
We'll share our hearts, have lot of fun.*

*Together we'll fight against our fears
Wrinkles and furrows have formed my face,
not all wishes and dreams will come true*

*We'll have some ups and we'll have some downs,
But we'll walking side by side*

*Every day brings new impressions,
The past is catching up with us again
never lose sight of the horizon,*

*Where the gleam of hope still shines
How we discover our new life together,
so much things we have to see and do*

*Not only diamonds are forever,
But we'll walking side by side*

*I don't wanna fall asleep tonight without you,
I never thought I would find a girl like you, babe
I love you with all my heart, I swear that it's true*

*What's happened in the past,
and still where we wanna go*

*I wanna spend the rest of life with you,
if you still don't know
the way you make me feel inside,
makes life's hills easy to climb*

*I hope that I can take this stand,
We'll walking side by side*
